Subject Draft DPP comment response -Reply

---

I read the response to comments and continue to disagree with KH on two major points. First, I believe the DPP should include at least the first 6 or 7 points made in the July letter regarding the baseline for management of remediation and process wastes. Those items represent our collective thoughts on how flexible we as a Department may be. The exact ARARs may be negotiated based upon risk, etc.

The second point is that KH seems to have ignored the comment regarding disposal on-site of building rubble. I believe that the DPP should at least outline the conclusions reached at our meeting with AGO.

That's all. Thanks Ed
